Help Send Silas and Other Kids with Neurofibromatosis to Camp!

Silas has NF1, a type of neurofibromatosis.

The Neurofibromatoses are a set of devastating disorders that can cause tumors to grow on or in the body at any time. These disorders can also cause a host of other complications.

Camp New Friends offers children and teens (ages 7-16) with Neurofibromatosis seven days and six nights of summer fun and social connections. It serves to reduce the stigma and isolation that is often associated with neurological disorders and chronic health conditions.

The camp is an effective way for children to learn more about their condition and to develop adaptive behaviors. At Camp New Friends children learn from peers and adult volunteers who live effectively with neurofibromatosis and are offered hope for the future.

It's not just fun and games. Support groups and educational programs promote knowledge, skill development and social connections. Children and teens gain a better understanding of their condition, strengths and self-worth.

Your golf registration or sponsorship will make a huge difference in the life of a child with NF!
