Great Steps 4NF 2019 Sponsorship Agreement

What is Neurofibromatosis?

Neurofibromatosis (NF) is a disorder that causes tumors to grow anywhere in the body at any time. Children and adults may lose a limb, eyesight, hearing, or their life to these tumors. It also can cause many other difficulties including learning disabilities, bone abnormalities, seizures, pain, and more. Approximately 1 in 2,500 people are affected by neurofibromatosis, yet NF lacks the support for care and research that families, children, and adults with this extremely complicated disorder need.

NF Midwest

NF Midwest is committed to improving the lives of children, adults, and families impacted by neurofibromatosis. Our continued focus and foundation is on Clinics, Awareness, Research, Education, and Support in the states of Illinois, Indiana, Iowa, Kentucky, Wisconsin, and the eastern half of Missouri.

Great Steps 4NF

Join the NF community and participate in a Great Steps 4NF walk Saturday, September 21st, 2019 in Madison, WI. The Great Steps 4NF Walks include Wisconsin, Indiana and one of the largest walk for NF in the country in Naperville, IL. These walks bring co-workers, friends, and family together as one community for the neurofibromatosis cause. Every walk varies in size but all have fun and friendship as the theme and our loved ones with NF as the center.
