# Walk4NF Your Way 2021 Sponsorship Agreement

## What is Neurofibromatosis?

Neurofibromatosis (NF) is a disorder that causes tumors to grow anywhere in the body at any time. Children and adults may lose a limb, eyesight, hearing, or their life to these tumors. It also can cause many other difficulties including learning disabilities, bone abnormalities, seizures, pain, and more. Approximately 1 in 2,500 people are affected by neurofibromatosis, yet NF lacks the support for care and research that families, children, and adults with this extremely complicated disorder need.

## NF Midwest

NF Midwest is committed to improving the lives of children, adults, and families impacted by neurofibromatosis. Our continued focus and foundation is on Clinics, Awareness, Research, Education, and Support in the states of Illinois, Indiana, Iowa, Kentucky, Wisconsin, and the eastern half of Missouri.

## Walk4NF Your Way

Join the NF community and participate our virtual walk's 4NF. These include our Naperville walk which pre-COVID was the largest walk for NF in the country (approximately 800-1000 attendees) and our Madison walk (200 to 250 attendees). They may also include smaller virtual walks. The Naperville and Madison walk will feature teams and individuals walking on a specific morning and joining us online afterwards.
