

2022 Walk4NF Opportunities

**NO ONE FIGHTS ALONE!
PEOPLE WITH NF NEED SUPER
BUSINESSES, SUPER
SUPPORTERS,
SUPERHEROES!**

Dear Friend,

After two long years, we are very hopeful that our neurofibromatosis communities are coming back together at our Walk4NF events. These events raise funds for research and care, and provide support and education, so that **No One Fights Alone**.

We need organizations and people like you to help us get back on track in the fight to improve the lives of the many children, adults, and entire families struggling with neurofibromatosis. We can't do this alone. We need super businesses, super supporters, true superheroes to help us get it done.

Please, look over our material and consider what opportunities and support you may be able to provide. Currently, we have four walks planned and have opportunities that will cover all the walks or opportunities to help at something more local.

I'd be pleased to discuss possibilities with you, or if there is a local volunteer listed at the bottom, you may choose to contact them.

Thanks for taking the time to consider helping.

Sincerely,

Diana Haberkamp
Executive Director

Thank you for your time. I am contacting you regarding our Walk4NF in

_____ on the date of _____

If you have any questions or concerns you may contact NF Midwest at (630) 945-3562 or email at events@nfmidwest.org or you may contact me directly...

About NF Midwest

Neurofibromatosis Midwest is a nonprofit organization based in the Chicago area that is dedicated to improving the lives of the increasing number of men, women and children challenged by neurofibromatosis and schwannomatosis. These are conditions that cause tumors to form along the nervous system affecting 1 in 2500 people. Treatment can sometimes ease the pain but there is no cure. NF Midwest strives to improve the lives of those affected through our C.A.R.E.S approach; Clinics, Awareness, Research, Education, and Support are some of the ways that we support our community. NF Midwest is a 501(c)3 – EIN 22-2580173.

About Neurofibromatosis and Schwannomatosis

Neurofibromatosis (NF) is a complex, often devastating set of genetic disorders with possible complications throughout the entire body that may also hold the genetic mystery to a host of other human ailments. Affecting approximately 1 in 2,500 people or 2 million people worldwide, it appears equally in all races, ethnic groups, and genders. A common complication for a person with NF is the growth of tumors on the nerves anywhere in and on the body. There are currently several separate, distinct disorders classified as neurofibromatosis. This includes neurofibromatosis type 1 (NF1), neurofibromatosis type 2 (NF2), and schwannomatosis. Others are also being identified.

OPPORTUNITIES TO SPONSOR AND JOIN THE FIGHT

Note: Our walks will not have sponsors names on t-shirts. Instead t-shirts will have a QR code on the back that will lead people to a website with our sponsors, links to their websites when available, and information on neurofibromatosis.

FIGHT IN THE MULTIVERSE

Premium visibility on all materials, webpages, and press releases · Distribution of company material or table at events or give-away item · Separate custom banner placement at every event · Premium social media post across all social platforms · Special mention at all events · Logo on all events

Visibility on all materials, webpages, and press releases · Distribution of company give-away item at all events · Banner placement at every event · Social media post across all social platforms · Special mention at all events · Logo on all events

In-Kind Sponsorships

In lieu of cash donations consider helping us out with food, give-aways, prizes, services etc. What can you add to the fun?

Walk4NF Your Way 2022 Sponsorship Agreement

What is Neurofibromatosis?

Neurofibromatosis (NF) is a disorder that causes tumors to grow anywhere in the body at any time. Children and adults may lose a limb, eyesight, hearing, or their life to these tumors. It also can cause many other difficulties including learning disabilities, bone abnormalities, seizures, pain, and more. Approximately 1 in 2,500 people are affected by neurofibromatosis, yet NF lacks the support for care and research that families, children, and adults with this extremely complicated disorder need.

NF Midwest

NF Midwest is committed to improving the lives of children, adults, and families impacted by neurofibromatosis and to ensure that **No One Fights Alone**. Our continued focus and foundation is on Clinics, Awareness, Research, Education, and Support in the states of Illinois, Indiana, Iowa, Kentucky, Wisconsin, and the eastern half of Missouri.

Walk4NF Your Way

Join the NF community and participate one of our Walk4NF events. These include our Naperville, Illinois walk which we believe is the largest walk for NF in the country (approximately 800-1000 attendees); our Madison, Wisconsin walk (200 to 250 attendees); our Columbia, Missouri walk (150 to 200 attendees); and our new walk in Indianapolis, IN.
