

## Parents of children (ages 7 to 11) with neurofibromatosis type I (NF1)

*Help us learn more about the attention functioning  
of children with NF1!*

**What does participation involve?** Participation will take about 3 hours and will involve children completing cognitive tasks with and without electroencephalography (EEG) and parents completing questionnaires.

**Benefits?** Families who complete the session will receive a \$40 gift card. Each child will also get to choose a book to take home. You may also request a summary of your child's performance on brief screening measures. Furthermore, we hope to gain a better understanding of how attention develops in kids with NF1.

**Where?** The session will take place in-person at the Child Neurodevelopment Research Lab at the University of Wisconsin – Milwaukee.

**When?** Sessions can take place during the week (morning or afternoon) or on weekends.

**To participate, please contact the Child Neurodevelopment Research Lab at the University of Wisconsin – Milwaukee by emailing us at [cnrl-eeg@uwm.edu](mailto:cnrl-eeg@uwm.edu) or giving us a call at (414) 229-2586. We look forward to hearing from you!**

Project Title: Neural Underpinnings of Attention in Children with NF1  
IRB Protocol #: 19.A.214  
Approved: 03/24/2022
