

# NEUROFIBROMATOSIS (NF) AWARENESS MONTH

Join Us in Spreading Awareness.

## What is Neurofibromatosis (NF)?

Neurofibromatosis (NF) is a group of genetic conditions that cause tumors to grow on nerves and can affect multiple body systems, including the skin, brain, spine, and eyes.

## Neurofibromatosis (NF) Includes:

- Neurofibromatosis Type 1 (NF1)
- NF2-related Schwannomatosis (NF2-SWN)
- All other Schwannomatosis disorders (SWN)

## Why Awareness Matters!

- NF affects people of all ages
- Symptoms and severity vary widely
- Early recognition and specialized care can improve quality of life
- Education and support help individuals and families thrive

**No One Fights Alone.  
Support is Available**
